## PROJECTS

### Detection of Cyber Attacks In Network Using ml

This project aims to Detect the cyber-attacks using Machine Learning algorithms such as Support Vector Machine, Decision Tree and Random Forest. When an attack is detected a phone call, an e-mail and a SMS is sent to the user for security.

### Improvement of Image Transmission Using chaotic System and Elliptic Curve Cryptography

This project enhances the security and efficiency of image transmission by combining chaotic systems for data scrambling with Elliptic Curve Cryptography (ECC) for encryption. The approach ensures high security with low computational cost.
